

Let's Make a Face Mask!

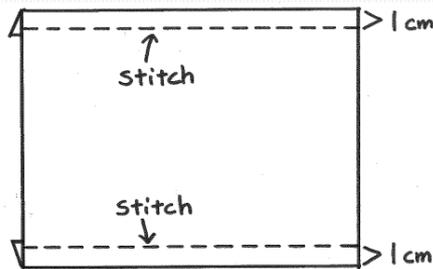

If you have no masks, you can make one with a piece of fabric you have. If you do not need pleats, you can cut the fabric shorter to the desired length.

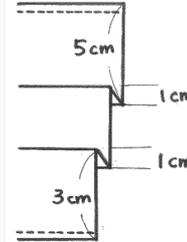

1. Cut the fabric into square (23 x 17cm). (20x15cm for lining if desired)

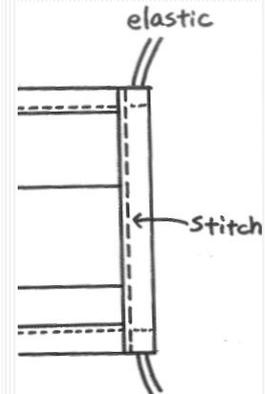

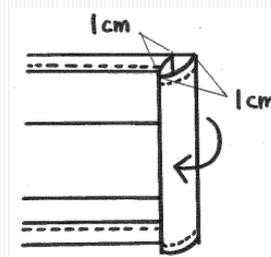

2. Fold over 1cm and stitch the wider hems.

3. Turn it over and make pleats as follows.

4. Turn it over again, fold inside both ends 1cm twice and stitch down. Pass through elastic.

Completed!

Ajisai (Hydrangea)

Ajisai first discovered in Japan is the symbol of the rainy season. The name "Hydrangea" comes from the Greek "hydor," meaning water, and "angos," meaning jar or vessel.

Rainy season starts in June and lasts until mid-July in main islands.

Tsuyu is such a humid season. One positive aspect is hydrangeas. They look even more magnificent with the addition of a few raindrops. A lot of people go out to enjoy the beauty of them during the season.

However, it would be different this year because of the spread of the new Coronavirus.

Products

Super Check (for the piping in a narrow space)

Manufacturer: ASTAM INC.

Two semi-circular plates are mounted to the valve body by hinge pin. When the fluid flows, each plate opens in a V shape centering on the hinge pin and fully opens up to the stop pin.

- * Short face to face dimension
- * Easy to install and remove
- * Simple structure, light weight
- * Suitable for high pressure
- * Body: A351 CF8M, etc.
- * Plate: A351 CF8M, etc.
- * Spring/Pin/Plug: SUS316, etc.
- * Seat: EPDM, etc.

※Various materials available. For details, please contact us.
