

## The Middle East Cuisine

We can enjoy cuisine from around the world in Japan. Indian, Chinese and Korean restaurants are everywhere.

Cuisine from other Asian countries and western countries are popular, too. People enjoy authentic cuisine without going to other countries.

What about cuisine from the Middle East in Japan?

### What our staff had

We are lucky to have a chance to enjoy different cuisine when we visit other countries, thanks to all our clients overseas. It is such a great advantage for us to know local food in your country.

Followings are what our staff had in the Middle East. They were all delicious! We take pictures of the local food whenever we have the chance.

On the websites, you will find many restaurants who serve Mediterranean food, Lebanese food, Turkish food, Arabian food, etc. Some of them serve dishes from more than one country.

Our staff had the chance to enjoy Arabian dishes when they visited the Middle East. One of our staff became a big fan of chickpeas after having hummus.

You will also find a lot of recipes of the Middle East cuisine on the websites in Japanese. People cook the Middle Eastern dishes because it is becoming easier to buy ingredients online than before and some can be replaced with Japanese products.

Tokyo Olympic games 2020 and Expo 2020 Dubai will be held in 2021. Then, Expo 2025 in Osaka. Through those events, the Middle East cuisine will draw more attention to Japanese people because its taste suits ours. We have originally been curious and adopted the food culture of other countries.

### Products

#### Trochoid<sup>®</sup> Pump (Oil pump)

Manufacturer: Nippon Oil Pump Co., Ltd.

- \* Small and intermediate capacity
- \* Medium discharge pressure
- \* Self-contained system
- \* Low noise, little wear, long service life
- \* Liquid temperature:  
-5~80 degrees Celsius
- \* Max. Pressure: 1.2 MPa

- \* Application: Hydraulic oil/lubricating oil/cooling oil transfer
- \* Viscosity: 10~500mm<sup>2</sup>/sec.
- \* Relief valves are available according to the capacity and set pressure
